BULLETIN # 35
(Version 2.0)

HMRT RESOURCE TYPING
RE-INSPECTION PROGRAM

RECERTIFICATION PROCEDURE

NOTIFICATION OF RE-INSPECTION DUE: A “Notification of HM Typing Re-Inspection Due” letter will be sent to the Agency reminding them via hard copy and email that it is time to prepare for a re-inspection. It will inquire if your agency wishes to participate in the HazMat Company Typing re-inspection program, and it will include a new “Point-Of-Contact” form to be completed.

FOLLOW THESE STEPS

Forms noted below in blue print are accessible on our Web Site:
http://www.caloes.ca.gov/FireRescueSite/Pages/Team-Typing-Information.aspx

First Step – POINT-OF-CONTACT: Please complete the “Point-Of-Contact” form and return to us as indicated. It is imperative that we maintain accurate and current contact information for a specified individual. Upon receipt, we will send to you a PACKET containing more information.

Second Step – SURVEY: The PACKET will contain an introductory letter with a set of step-by-step instructions. It will also include a “Hazardous Materials Company Typing, Re-Inspection Survey Questionnaire” document. This 7 page document is a “self-Inspection” form and contains approximately 35% of the equipment and tool items in the SEL, mostly low cost and disposable items. You are to conduct a self-inspection as explained, and return the survey form to us. This self-inspection also has the intent of shortening the actual On-Site inspection. The survey document will contain the bulk of low-maintenance equipment items, disposables, and low cost items. The survey document must be completed and sent back before the next series of steps can be initiated. The survey will be examined for accuracy and completeness. A copy of the “Re-Inspection Survey Questionnaire” document can also be accessed on our web-site.
Third Step – SELECT DATE: Once the preliminary “Re-Inspection Survey Questionnaire” document is returned to us and examined, a date and place for the On-Site portion of the Re-Inspection will be selected. The agency will be contacted to select an appropriate date for the on-site inspection.

Fourth Step – CONDUCT ON-SITE RE-INSPECTION: The On-Site Re-Inspection will be conducted by the Inspection Team using an “Hazardous Materials Company Typing, On-Site Re-Inspection Record”. The re-inspection will last about 1 to 1 ½ hours. It will be an abbreviated inspection as compared to the original (initial) inspection. Only those items, equipment and tools not included in the “Re-Inspection Survey Questionnaire” will be targeted and displayed for inspection and examination, and will consist mostly of high-maintenance items, kits, electronic instruments, high-cost items, and items prone to cyclic “shelf life”. A copy of the “On-Site Re-Inspection Record” will be included in the PACKET, and it will list the equipment and tools that will be included in the on-site re-inspection. A facsimile copy can also be accessed on our web-site.

Additionally, a “spot check” of ten (10) additional SEL items included in the “Re-Inspection Survey Questionnaire” self-inspection will be selected by the Inspection Team upon their arrival for the re-inspection as part of the on-site inspection.

If an agency has also requested an upgrade in their team typing status, one extra step will be followed: ALL of the associated equipment and tools for the appropriate team type MUST be made available for the on-site inspection. For example, if a team is requesting an upgrade from Type 2 to a Type 1, then all of the TYPE 1 EQUIPMENT and TOOLS required to achieve a Type 1 status must be displayed for inspection, in addition to the equipment and tools included in the “On-Site Re-Inspection Record”.

Fifth Step – REVIEW TRAINING RECORDS: During the on-site portion of the Re-Inspection, Training Records shall again be inspected. Inspection of the Training Records will be exactly as that as conducted during the original inspection. A facsimile copy of the “Training Inspection Record” that will be used by the Inspection Team can be accessed on our web-site.

Sixth Step – NOTIFICATION OF RESULTS: A “Re-Certification Report of Inspection” formal letter will be sent to the agency from Fire & Rescue Division, HazMat Unit, notifying them of the status and results of the re-inspection (Pass/Fail). It will also, when necessary, describe the steps required to remedy any deficiencies or discrepancies in order to attain a re-certification. A facsimile copy of the “Training Inspection Record” that will be used by the Inspection Team can be accessed on our web-site (noted above).

Seventh Step – CONGRATULATORY LETTER: Upon achieving a HazMat Team Typing re-certification, a “Letter of Congratulations” will be sent to the Department Fire Chief. It will be issued by the Fire Chief of CalOES Fire & Rescue Division.

Eighth Step – ISSUE OF CERTIFICATE: Upon achieving a HazMat Team Typing re-certification, a “Certificate of Achievement” documenting this accomplishment shall be sent to the Department Fire Chief.

INITIATION OF THE RE-INSPECTION HM TEAM TYPING PROGRAM

On behalf of the GOVERNOR’S OFFICE OF EMERGENCY SERVICES we would like to thank you for participating in the Cal OES Fire & Rescue Division’s Hazardous Materials Company Resource Typing program, and again congratulate you and the members of your department on obtaining a FIRESCOPE ICS-HM-120 hazardous materials resource typing status as noted above.

Enclosed please find your certificate. This certificate authenticates your Haz-Mat Team Typing Inspection and status. A new certificate of achievement will be issued with each subsequent recertification inspection.

We are about to engage our Re-Inspection Program. We will conduct the Re-Inspection Program in a chronological order based upon original Certification Dates. The Re-Inspection Program will adopt the following criteria:

- The initial (original) typing status and certification is valid for a minimum of 5 years;
- Certificates of Achievement will be issued to document the original haz-mat typing status;
- The Re-Inspection program will incorporate an abbreviated (shortened) on-site equipment inspection;
- The Re-Inspection typing status and certification will be valid for a minimum of 5 years;
- Certificates of Achievement will be issued to document each re-inspection haz-mat typing status.

According to our records, your initial (original) haz-mat company typing was issued:

August 5th, 2010, ANONYMOUS FIRE Haz-Mat Unit “HM-1”, Type 1

This letter is to advise that a haz-mat company typing re-inspection is due. Re-inspection must be completed within one (1) year of the date on this letter. Your “window of opportunity” to call for a haz-mat typing re-inspection is:

August 5th, 2015 to August 5th, 2016.
Would you and your agency be interested in continuing with the Cal OES Fire & Rescue Team Typing Program, and participate in the Re-Inspection Program?

☐ YES – RETENTION OF CURRENT TYPING STATUS:

Additional information and a full description of the procedures will be sent to you in a separate packet. Ample time will be available for you to select or suggest a convenient inspection date. The on-site re-inspection portion of the equipment and tools is abbreviated.

☐ YES – UPGRADE OF CURRENT TYPING STATUS TO A HIGHER STATUS:

Additional information and a full description of the procedures will be sent to you in a separate packet. Ample time will be available for you to select or suggest a convenient inspection date. Upgrade to a higher HM team typing status will require that all of the SEL equipment and tools obtained to achieve the next higher certification status will have to be displayed. This will be in addition to the abbreviated (shortened) equipment and tools re-inspection.

☐ NO – Not at this time.

You will have one year from the date of this letter as explained above to notify us that you are ready for a re-inspection. If the one year expires, your current hazardous materials team typing status will expire. To obtain a new hazardous materials team typing status you will be required to undergo a full on-site inspection.

If yes, please complete the following:

1. Update your “Point-Of-Contact” information below:

Receipt of the “Point-Of-Contact” form will initiate the re-inspection process. We need to update our records and keep them current.

<table>
<thead>
<tr>
<th>Project Point – Of – Contact:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current Chief Of Department (Please print all information)</td>
</tr>
<tr>
<td>☐ A</td>
</tr>
<tr>
<td>Temporary HM Point-Of-Contact (Please print all information)</td>
</tr>
<tr>
<td>☐ A</td>
</tr>
<tr>
<td>Mailing Address (Street or P.O. Box)</td>
</tr>
<tr>
<td>☐ A</td>
</tr>
<tr>
<td>Work Location Address (Street – if different)</td>
</tr>
<tr>
<td>☐ A</td>
</tr>
<tr>
<td>E-mail address:</td>
</tr>
</tbody>
</table>

2. Confirm the following:

HMRT Company or Companies you would like to have inspected; The company typing (Type 1, 2, or 3); And the preferred location of the inspection:

<table>
<thead>
<tr>
<th>Company Number Designation</th>
<th>OES MACS Designation</th>
<th>Type 1, 2, or 3?</th>
<th>Station #</th>
<th>Street Address, Town, and Zip Code (Where inspection will be conducted)</th>
<th>Phone # at Inspection Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ 1st</td>
<td>☐ A</td>
<td>☐ A</td>
<td>☐ A</td>
<td>☐ A</td>
<td>☐ A</td>
</tr>
<tr>
<td>☐ 2nd</td>
<td>☐ A</td>
<td>☐ A</td>
<td>☐ A</td>
<td>☐ A</td>
<td>☐ A</td>
</tr>
</tbody>
</table>

3. Return a copy of THIS PAGE (Contact information) to:

By Mail: Governor’s Office of Emergency Services
Fire & Rescue Division, HazMat Section
3650 Schriever Avenue
Mather, CA, 95655

By FAX: 916-845-8734

By E-Mail: hazmat@caloes.ca.gov
4. A packet of additional information will be sent to you upon receipt of the "Point-Of-Contact" information. It will include a Re-Inspection Survey Questionnaire. It includes about 1/3 of the equipment in the SEL and is a "Self-Inspection". Instructions will be included. This will shorten the on-site inspection which will follow. You will be required to return this Re-Inspection Survey Questionnaire.

5. Upon receipt of the survey, this office will then contact you to determine an appropriate inspection date for the on-site re-inspection. The re-inspection will be an abbreviated inspection which includes the remaining 2/3rds of the equipment in the Standardized Equipment List.

6. Also inspected will be a review of your haz-mat training records to assure they are current. Please have them at the ready.

A complete description and explanation of the five (5) year automatic Hazardous Materials Resource Typing re-inspection and re-certification program, along with all of the appropriate forms and documents, can also be found on our haz-mat web page at:

http://www.caloes.ca.gov/FireRescueSite/Pages/Team-Typing-Information.aspx

If you have any questions or need guidance, please feel free to contact us at any time.

Sincerely,

JAN DUNBAR
Division Chief
Fire & Rescue Division
Special Operations
