APPENDIX F

Butte County Sheriff

SMS Text-to-9-1-1 via IP Interface

Test Results

March 27, 2014
Test Cases

1. Verify PSAP procedures in place when non-test SMS 9-1-1 text is delivered
2. Verify test 9-1-1 SMS text is delivered to correct PSAP and rebid capability
3. Verify action if PSAP does not respond to test 9-1-1 SMS text
4. Verify 2 simultaneous SMS 9-1-1 text can be handled by one call taker
5. Verify bounce back message delivered when third 9-1-1 SMS text is sent
6. Verify text conversation is still up if cell phone is powered down and powered up
7. Verify texter receives bounce back if standing inside Butte County Sheriff jurisdiction but Cell tower centroid is in different PSAP jurisdiction.
8. Verify 9-1-1 SMS text will be delivered to Butte County Sheriff if texter is standing outside Butte County Sheriff jurisdiction but the cell tower centroid is within Butte County Sheriff jurisdiction
9. Verify 9-1-1 SMS texter receives a bounce back when added to deny list (Not available with Intrado solution)
10. Verify 9-1-1 SMS texter receives a bounce back when PSAP has provisioned a Time of Day (Not available with Intrado solution)
11. Verify ability for second call taker to take over SMS text session
12. Verify bounce back is received when both trunks are busy
13. Verify transfer capability from Butte County Sheriff to Chico PD (Not available at this time)
14. Verify results when texter send more than 160 characters and verify results when sending symbols not supported in TTY
15. Verify SMS text-to-9-1-1 sessions are being recorded in ECaTS
<table>
<thead>
<tr>
<th><strong>TEST #1</strong></th>
<th><strong>Non test Text is sent to Butte County Sheriff</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective/Description</strong></td>
<td>This test verifies that when Butte County Sheriff receives a non-test text they will manually send canned bounce back response Text (when service is not available)</td>
</tr>
<tr>
<td><strong>Resources</strong></td>
<td>Texter in field and centroid within Butte County Sheriff jurisdiction.  Call taker to receive text  INTRADO to monitor text session</td>
</tr>
<tr>
<td><strong>Test Setup</strong></td>
<td>1. Verify Texter is ready  2. Send test SMS 9-1-1 Text to verify bounce back (from Verizon Wireless)  3. Verify TCC is provisioned and ready  4. Verify the target PSAP is available.  5. Verizon Wireless/INTRADO turn on 9-1-1 texting for Butte County Sheriff</td>
</tr>
<tr>
<td><strong>Procedure</strong></td>
<td>1. Text message “I have a flat tire”  2. Call taker should recognized this is not part of our testing (because the text does not start with this “is a test”) and reply back with the canned bounce back message (should be same message they would see from Verizon Wireless)  3. PSAP to end text session.</td>
</tr>
<tr>
<td><strong>Verification</strong></td>
<td>1. Verify bounce back received from Verizon Wireless on initial test  2. Once service is activated verify canned bounce back is sent by PSAP.  3. Verify release text received by Texter.</td>
</tr>
<tr>
<td><strong>Text time</strong></td>
<td>Send to receive:</td>
</tr>
<tr>
<td><strong>Notes</strong></td>
<td><strong>Date/Time:</strong>  <strong>Tester:</strong>  Canned bounce back not built in so was unable to test this case.</td>
</tr>
<tr>
<td>TEST #2</td>
<td>Texter send 9-1-1 SMS text and routes to Butte County Sheriff</td>
</tr>
<tr>
<td>---------</td>
<td>-------------------------------------------------------------</td>
</tr>
<tr>
<td>Objective/Description</td>
<td>This test verifies Text can be delivered to Butte County Sheriff and rebid for location is functioning.</td>
</tr>
</tbody>
</table>
| Resources | Texter in field and centroid within Butte County Sheriff jurisdiction.  
Verizon cell phone with location agent activated  
Call taker to receive text  
INTRADO to monitor text session |
| Test Setup | 1. Verify Texter is ready  
2. Verify TCC is provisioned and ready  
3. Verify the target PSAP is available. |
| Procedure | 1. Send a SMS text (starts with this is a test) to 911 to initiate a dialog.  
2. Respond to the incoming RFA at the PSAP and send a few messages back and forth between the PSAP and texter.  
3. After 20 seconds rebid for location.  
4. PSAP ends text session. |
| Verification | 1. Verify the RFA is received by the PSAP configured for this test case.  
2. Verify the transcript is received by the PSAP when the dialog connected, and location information is properly displayed and call back number displayed.  
3. Verify all messages sent by the PSAP are sent to the mobile handset.  
4. Verify all messages sent by the mobile are received by the PSAP.  
5. verify lat/long changes from centroid to actual location of texter  
6. Verify release text received by Texter. |
| Text time | Send to receive: 16 seconds |
| Notes | Test text from 916-698-XXXX at 10:24:53  
Received at BCSO on 9-1-1 CPE text IP window  
“this is the 911 office test”  
Latitude/longitude was receive in the body of the text (there was not ALI in the ALI screen) 39.623180, -121.619400  
Canned message was sent by the PSAP “911 what is your emergency” and “you have reached BCSO”  
A few more text were exchanged back on forth  
BCSO released the text session at 10:27:38  
No rebid capability available in this solution |
<table>
<thead>
<tr>
<th>TEST #3</th>
<th>Texter sends SMS to 911, INTRADO TCC receives and provides routing instruction, Route to PSAP – Butte County Sheriff does not respond to text</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective/Description</strong></td>
<td>This test verifies that TCC responds to an initial text that is not responded to by the PSAP with a canned message.</td>
</tr>
</tbody>
</table>
| **Resources** | Texter in field within Butte County Sheriff jurisdiction.  
Call taker to receive text  
INTRADO to monitor text session  
Timer to time send receive time |
| **Test Setup** | 1. Mobile phone activated and ready  
2. Verify TCC is provisioned and ready  
3. Verify the target PSAP is available. |
| **Procedure** | 1. Send a SMS to 911 to initiate a text session.  
2. PSAP does not respond to initial text  
3. After 30 seconds TCC send canned message to Texter.  
4. If PSAP and Texter converse a couple of times and the PSAP goes silent for 30 seconds, will a canned message be sent to Texter? |
| **Verification** | 1. Verify the RFA is received by the PSAP configured for this test case.  
2. Verify the transcript is received by the PSAP when the dialog connected  
3. Verify PSAP non response message received by Texter |
| **Text time** | Send to receive: **59 seconds to receive bounce back message** |

**Notes**

Test text from 916-698-XXXX at 10:31:20  
Received at BCSO on 9-1-1 CPE text IP window  
“Test, test, test”  
BCSO did not respond to this text  
Texter received a bounce back message at 10:32:19
<table>
<thead>
<tr>
<th><strong>Case #4</strong></th>
<th><strong>Two simultaneous SMS Text 911 from different users, Routed to Butte County Sheriff</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective/Description</strong></td>
<td>This test verifies that TCC can process the scenario of initiating two dialogs from different texters with the delivery of the messages to Butte County Sheriff.</td>
</tr>
</tbody>
</table>
| **Resources** | 2 SMS Texters  
1 9-1-1 Call Taker  
2 timers |
| **Test Setup** | 1. Two mobile phones activated and ready  
2. Verify TCC is provisioned and ready  
3. Verify the target PSAP is available. |
| **Procedure** | 1. Initiate two dialogs by sending an SMS to 911 from two different mobile handsets simultaneously.  
2. Respond to the two incoming RFAs at the PSAP and send a few messages back and forth between the PSAP and texter.  
3. PSAP ends text session. |
| **Verification** | 1. Verify that both RFAs are received by the PSAP configured for this test case.  
2. Verify the transcript for each dialog is received by the PSAP. Verify all messages sent by the PSAP are sent to the texter.  
4. Verify all messages sent by the texter are received by the PSAP. |
| **Text time** | **Text session 1 send to receive:** 916-207-XXXX 11.32 seconds  
**Text session 2 send to receive:** 916-698-XXXX 16.34 seconds |
| **Notes** | Test text from 916-207-XXXX at 10:37:17  
Received at BCSO on 9-1-1 CPE text IP window 10:37:29  
“Test Wes”  
Lat/Lon 39.623180, -121.619400  
BCSO replied “you reached BSCO”  

Test text from 916-698-XXXX at 10:38:00  
Received at BCSO on 9-1-1 CPE text IP window 10:38:16  
“Multiple text simo Jim’s phone.2 “  
Lat/Lon 39.623180, -121619400  
BCSO replied “you have reached BCSO”  
Another text was sent from both texters and BCSO released the calls |
<table>
<thead>
<tr>
<th>Case #5</th>
<th>Three simultaneous SMS Text to 911 from different texters, INTRADO TCC receives and provides routing instruction, 2 text Route to Butte County Sheriff, 1 text receives a Bounce Back Message</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective/Description</strong></td>
<td>This test verifies that TCC can process the scenario of initiating two dialogs from different texters with the delivery of the messages to Butte County Sheriff, and the third texter should receive a bounce back message. Butte County Sheriff provisioned with session limit of 2.</td>
</tr>
</tbody>
</table>
| **Resources** | 3 SMS Texters  
2 9-1-1 Call Taker |
| **Test Setup** | 1. Three Verizon Wireless mobile phones  
2. Verify TCC is provisioned and ready with session limit of 2  
3. Verify the target PSAP is available. |
| **Procedure** | 1. Initiate three dialogs by sending a SMS to 911 from three different mobile handsets simultaneously.  
2. Respond to the two incoming RFAs at the PSAP and send a few messages back and forth between the PSAP and mobile handsets.  
3. PSAP ends Text session. |
| **Verification** | 1. Verify that both RFAs are received by the PSAP configured for this test case.  
2. Verify the transcript for each dialog is received by the PSAP.  
3. Verify all messages sent by the PSAP are sent to the texter.  
4. Verify all messages sent by the texter are received by the PSAP.  
5. Verify third texter received a bounce back message |
| **Text time** | Send to receive:  
For this test, BCSO had 4 dispatchers logged in and had two of them log out. Leaving only 2 dispatchers to take 911 calls and texts  
Text were sent by the following  
916-207-XXXX  
916-698-XXXX  
530-370-XXXX  
530-370-XXXX |
| **Notes** | 916-207-XXXX and 916-698-XXXX were received at the PSAP  
530-370-XXXX was in queue  
530-370-XXXX received a bounce back message  
Per Intrado, based on an algorithm: the minimum number of texts before bounce backs would be sent would be equal to the # of call takers logged in at a given time per PSAP plus one text waiting in queue. |
### Test #6

#### Text Conversation when device powered down powered back up

<table>
<thead>
<tr>
<th>Objective/Description</th>
<th>This test verifies the text conversation continues even if the mobile phone is powered down and turned back on within 5 minutes.</th>
</tr>
</thead>
</table>
| Resources             | Texter in field and centroid within Butte County Sheriff jurisdiction  
                        | 9-1-1 Call taker  
                        | Timer |
| **Test Setup**        | 1. Mobile phone activated and ready  
                        | 2. Verify TCC is provisioned and ready  
                        | 3. Verify the target PSAP is available. |
| **Procedure**         | 1. Send SMS to 911 to initiate a dialog  
                        | 2. Respond to the incoming RFA at the PSAP and send a few messages back and forth between the PSAP and mobile  
                        | 3. Texter powers down mobile phone.  
                        | 4. PSAP to send another text while phone is powered down.  
                        | 5. Texter powers on phone after waiting 5 minutes  
                        | 6. PSAP verifies original SMS conversation is up.  
                        | 7. Texter sends SMS to continue same text session  
                        | 8. Respond to the incoming RFA at the PSAP and send a few messages back and forth between the PSAP and texter.  
                        | 9. PSAP ends text session |
| **Verification**      | 1. PSAP and texter verifies status of SMS conversation was continuous, verify no automatic message was delivered by PSAP or INTRADO because of time between text messages. |
| **Text time**         | Send to receive: 16 seconds |
| **Notes**             | Test text from 916-698-XXXX at 10:37:17  
                        | Received at BCSO on 9-1-1 CPE text IP window 10:37:29  
                        | “Test Test”  
                        | Lat/Lon 39.623180, -121.619400  
                        | BCSO replied “you reached BSCO”  
                        | Phone was powered down at 10:38:20  
                        | Phone was powered back on at 10:43:28  
                        | BCSO placed text on hold  
                        | Texter placed another text  
<pre><code>                    | Call Taker could tell there was a new text because the status of the Text said “Updated” |
</code></pre>
<table>
<thead>
