## LEPC's ROLE AND FUNCTION

In 1986 Congress passed the Emergency Planning and Community Right-to-Know Act as Title III of the Superfund Amendments and Reauthorization Act (SARA). This law was enacted to help communities protect public health and safety and the environment from chemical hazards.

To implement Title III, Congress required each state to appoint a State Emergency Response Commission. The commissions, in turn, were required to divide their states into emergency planning districts and name a Local Emergency Planning Committee (LEPC) for each district. In California, Executive Order 0-63-87 created the Chemical Emergency Planning and Response Commission (CEPRC). The Commission has further established six Local Emergency Planning Committees (corresponding to the six state Office of Emergency Services mutual aid regions). Region VI comprises the county areas of Imperial, Inyo, Mono, Riverside, San Bernardino, and San Diego. The LEPC members' fields of expertise (e.g. fire, health, agricultural, industry, first aid, local environmental, hospital, transportation, law enforcement, community groups, administering agencies, civil defense, elected official, emergency management, and media) provide the assurance that all the necessary elements of the planning process are represented.

The LEPC is the focal point for the Title III activities in the region and is intended to be consistent with planning efforts of local government. The performance of the LEPC is critical to ensuring that the public benefits from the opportunities and the information provided for under the law.

The LEPC is appointed by the CEPRC and has the responsibility for supervising and coordinating the activities of the LEPC's. The basic LEPC mission is to:

- Develop a comprehensive regional emergency plan and to update the plan at least once yearly.
- Receive information about chemical releases for regional planning purposes and hazard analysis.
- To assist the public in access to information on hazardous chemicals in their community.
- To communicate and educate the public about risks from accidental and routine releases of hazardous chemicals.

These responsibilities of the LEPC are stated in law. Other activities may include providing a forum to discuss related hazardous materials issues.

# CHEMICAL EMERGENCY PLANNING AND RESPONSE COMMISSION MISSION STATEMENT

## **Authority:**

The establishment of a State Emergency Response Commission is mandated by Superfund Amendments and Reauthorization Act, Title III of 1986. This authority is vested in the Chemical Emergency Planning and Response Commission (CEPRC) by the Governor's Executive Order D-63-87. The CEPRC is also tasked by Section 25503.1 of Chapter 6.95 of the California Health and Safety Code.

## **Mission:**

The mission of the Chemical Emergency Planning Response Commission (CEPRC) is to coordinate and supervise implementation of California's hazardous material emergency planning community right-to-know program. This includes federal and state programs to prevent, mitigate, and respond to hazardous material emergencies and ensure public availability of appropriate chemical information as prescribed by law. The membership of the CEPRC is defined in the Executive Order, which has been interpreted by the CEPRC to also include membership of one representative from each of the six Local Emergency Planning Committees (LEPC). The CEPRC has several purposes, including, but not limited to:

1. Enhance public safety and environmental protection through efficient
2. Implementation of hazardous material emergency planning and community right-to-know laws.
3. Supervise and coordinate the establishment, membership, and program related activities of the LEPC's.
4. Review LEPC emergency planning activities.
5. Coordinate state agency activities in the area of hazardous material emergency planning and community right-to-know laws, while ensuring that the legal and jurisdictional autonomy of each of these agencies/departments to act in these areas are preserved.
6. Promote, assist, and guide local, regional and state government activities to integrate hazardous material planning and accident prevention programs and eliminate unnecessary program overlap.
7. Provide a forum for the consideration of ideas and concerns of public and private interests in the implementation of hazardous material emergency programs.
8. Ensure a mechanism for timely review and processing of requests for hazardous material information legally available to the public under this program.
9. Facilitate the identification of resources to promote fulfillment of 1 - 7

# LOCAL EMERGENCY PLANNING COMMITTEE MISSION STATEMENT

## **Authority:**

The establishment of Local Emergency Planning Committees (LEPC) is mandated by Superfund Amendments and Reauthorization Act, Title III of 1986. This authority is vested in the six California LEPC's by the Chemical Emergency Planning and Response Commission (CEPRC). Categories of the membership on the LEPC are established by the CEPRC; however, each LEPC has discretion to add up to four ad hoc categories.

## **Mission:**

As coordinated and supervised by the CEPRC, the mission of the LEPC/s is to coordinate implementation of California's hazardous material emergency planning and community right-to-know program at the OES region level. . This includes implementation of federal, state, and local programs to prevent, mitigate, and respond to hazardous material emergencies and ensure public availability of appropriate chemical information as prescribed by law.

The LEPC's have several objectives, including, but not limited to:

1. Development and implement the regional hazardous material emergency plan consistent with state and federal law, focusing on:
  - identification of chemical risks, especially those that could have cross-jurisdictional impacts or require multi-jurisdictional response resources;
  - identification of transportation related chemical risks;
  - identification of local public and private response capabilities;
  - facilitating agreements or systems to mitigate or reduce shortfalls in capabilities.
2. Provide a forum for the consideration of ideas and concerns of public and private interests in the implementation of hazardous material emergency programs within the region.
3. Enhance public safety and environmental protection by facilitating the implementation of hazardous material emergency planning and community right-to-know laws.
4. Promote education and awareness programs, and sponsor such programs, as necessary, to educate the community relating to hazardous material emergency planning and community right-to-know programs.
5. Facilitate local government emergency planning activities, such as drills, exercises, education, and training that enhance hazardous material emergency preparedness or by obtaining necessary emergency planning information from facilities.
6. Work with local administering agencies (M) to promote a mechanism for timely review and processing of requests for hazardous material information that is legally available to the public under these programs.
7. Promote, assist, and guide activities (in conjunction with the M's) to integrate and refine hazardous material emergency planning and accident prevention programs and eliminate unnecessary program overlap.

## LOCAL EMERGENCY PLANNING COMMITTEE (LEPC) CATEGORY DESCRIPTIONS

This policy of the Chemical Emergency Planning and Response Commission should be used as a guide by LEPC's when recruiting new members. Overall, LEPC members should have a substantial interest in reducing the risks posed to the public and emergency responders by hazardous materials. Local experience, and a regional perspective are highly desirable attributes. Each member shall enhance regional emergency preparedness through outreach activities and by networking with other organizations within their area of representation.

**ADMINISTERING AGENCY:** This position represents local administering agencies (AA's) under Chapter 6.95 of the Health & Safety Code. The individual selected for this position must be employed by an administering agency. This person should be knowledgeable of the activities of other AA's in the region and willing to work with AA's for coordination of their views into LEPC programs.

**AGRICULTURE:** This position should be represented by an agricultural commissioner or member of their staff who is familiar with the regional agricultural situation and can understand and solicit the opinions of this sector. The individual appointed to this position would network and interact with the agricultural community and regulatory agencies regarding the management and control of hazardous materials. The incumbent should be a resource for information concerning regional agricultural use and the impact of hazardous material programs on agribusiness.

**CIVIL DEFENSE:** Represented by a city or county emergency services official, this position provides expertise on emergency response planning and management for disaster preparedness and hazard mitigation. By networking with other organizations within their area of representation this member should work to integrate mutual-aid systems.

**COMMUNITY GROUPS:** This position represents community interest organizations and groups. The community member category is proactive in formulating right-to-know outreach programs. Candidates for this position should be selected from civic organizations or community associations interested in community hazard mitigation.

**ELECTED OFFICIAL:** This position is for an elected representative of local or state government such as a county supervisor, city council member, or state "legislator. In some cases, a designated representative of the official may be appropriate. The individual selected for this category should provide public leadership and political visibility to the committee; coordinate political support activities for hazardous materials issues through regional councils and associations.

**EMERGENCY MANAGEMENT:** This position represents state emergency management and mutual-aid coordination for disaster operations at the regional level and is usually represented by the OES regional manager.

**FIRE:** This position represents the first responders, community and district fire service agencies/departments. The individual selected for this position should be a department or battalion officer, who is knowledgeable in hazardous material response. The individual in this position represents the fire service community through mutual aid regions, community agencies and professional associations.

**FIRST AID:** This position represents emergency medical response providers, both public and private, including ambulance companies, paramedical groups/units and volunteer organizations with disaster first aid response capabilities. The individual selected for this position should be a member of an emergency medical service organization, paramedical groups or the American Red Cross.

**HEALTH:** This position represents the local public health service agencies in the region. The individual appointed to this position provides expertise on hazardous materials safety, education, program management, and planning. Members are selected from county or community health departments.

**HOSPITAL:** This position represents both private and public hospital and emergency medical treatment facilities. The individual appointed to this position shall facilitate developing emergency medical response preparedness for hazardous materials at the local community and regional levels. Members are selected from regional hospital or medical center emergency medical coordinators.

**INDUSTRY:** This position represents businesses and industries that are regulated by current hazardous materials legislation. The individual in this position should provide knowledge on hazardous material use, impact, and emergency planning in major facilities and small businesses. Members selected for this position should be active participants in regional associations and networks.

**LAW ENFORCEMENT:** This position represents the local law enforcement agencies within the region. The individual in this position shall communicate planning and preparedness needs for hazardous materials response and mutual-aid. The members in this category are from county sheriffs office, city police departments, or from a local CHP office.

**LOCAL ENVIRONMENTAL:** This position represents regional concerns for protecting the environment and mitigating the effects of hazardous materials. The individual selected for this category represents organizations or institutions whose primary interest or mission is environmental protection.

**MEDIA:** This position represents local and regional broadcast and print media on emergency response and community right-to-know issues. The individual appointed to this position would assist in organizing/developing public information concepts and procedures for regional hazardous materials emergency preparedness.

**TRANSPORTATION:** This position represents all modes of hazardous materials transportation within the planning region. The individual in this position is knowledgeable of operations, regulations and procedures regarding the transport of hazardous materials. The member selected for this position is usually a regional/district supervisor or director for CAL TRANS, Public Utilities Commission, or CHP; or a manager in the transportation or transportation support industry.

## AD HOC CATEGORIES

Each LEPC has the authority to establish four additional categories. All four categories do not have to be established. These categories can be used by an LEPC to expand representation on the committee and to obtain additional expertise. These categories cannot represent the same area of interest. Some LEPC's have considered the additional categories of air pollution control, legal, and federal facilities.

**AIR QUALITY:** Represented by a technically qualified professional in the field of air quality, this position will provide expertise on hazardous material/air quality issues. The individual selected will provide assistance in developing the hazards analysis techniques and will help educate the LEPC on the air toxic issues~ The incumbent should be able to advise the administering agency subcommittee of relevant State and Federal legislation/regulation that may affect the administering agencies when air quality is involved. Air modeling/dispersion experience is highly desirable.

**CAER (COMMUNITY AWARENESS/EMERGENCY RESPONSE):** This position shall be filled by a member of a Region VI CAER committee who is in good standing. The person shall act as a liaison between all Region VI CAER groups and the LEPC to facilitate emergency planning, hazardous materials exercises and community right-to-know.

**RURAL NORTH:** This position should be represented by an individual familiar with the Inyo/Mono County region and who can provide the perspective of the rural north of Region VI in community right-to-know issues. The individual selected for this position should provide expertise in issues unique to the rural north.

**RURAL SOUTH:** This position should be represented by an individual familiar with the Imperial County region and who can provide the perspective of the rural south of Region VI on community right-to-know issues. The individual selected for this position should provide expertise in issues unique to the rural south.

**SUPERFUND AMENDMENT & REAUTHORIZATION ACT (SARA) TITLE III  
ALSO KNOWN AS THE CHEMICAL EMERGENCY PLANNING &  
COMMUNITY "RIGHT-TO-KNOW" ACT (SUMMARY)**

SEC 301	Establishes State Commissions, Committees (LEPC) & Planning Districts
SEC 302	Substances (listed Materials) and Facilities Covered, and notify State Commission
SEC 303	Emergency Response Plan Required (identify facilities, resources, methods & procedures, designation of community coordinators, timely notification, evacuation plans, hazards and training programs)
SEC 304	Emergency Notification Immediately for extremely hazardous substances & written follow-up.
SEC 305	Emergency Response Training & review of Emergency Alerting and Response Systems
SEC 311	Reporting requirements - Material Safety Data Sheets (MSDS) or list of materials.
SEC 312	Report inventory to State, LEPC and Fire Department (only to the local Administering Agency in California). This information is available to the public, except as provided for
SEC 313	Toxic Chemical Release information - Applies to specific categories of facilities
SEC 321	Relationship to other laws modify federal law)
SEC 322	Trade Secrets - Allowed only as provided for in law (must be determined in court)
SEC 323	Information to Health Professionals, Doctors, and Nurses - Must be provided when there is a need
SEC 324	Public shall have access to plans, data sheets, inventory forms as provided for
SEC 325	Enforcement - Monetary penalties can be assessed for non-compliance of this law.
SEC 326	Citizens have the authority to bring civil actions against a facility for not complying with law

**CHAPTER 6.95 HEALTH & SAFETY CODE:  
HAZARDOUS MATERIAL DISCLOSURE LAW**

SEC 25000	Establish business & Area Plans for hazardous material handlers criteria
<b>SEC 25501</b>	<b>DEFINITIONS</b>
SEC 25501.1	Hazardous Substances listed in federal regulations: applies to state
SEC 25501.2	Storage of materials in transit: not "stored" if less than 30 days.
SEC 25501.4	Compliance by public agency which is business; State colleges and Universities
SEC 25502	Implementation by counties and cities
SEC 25503	Business Plans & Area Plans, the minimum standards & requirements
SEC 255031	Adoption of reporting requirements by agencies in cooperation with CEPRC
SEC	Environmental Affairs Agency to develop a hazardous materials compliance

25503.2	assistance manual
SEC 25505.5	Business Plan for emergency response; exemptions; emergency rescue personnel (provide information to emergency response personnel on a 24-hour basis)
SEC 25503.6	Notification of property owner that business plan is required of tenant
SEC 25503.7	Railroad cars stored 30 days or more are subject to file business plans.
SEC 25503.8	Establishment of business plans by other specified businesses.
SEC 25504	Business Plans - Contain emergency response plans, training, & inventory data
SEC 25505	Business must review the plan biannually, inventory annually, & certify complete. Business plans (records) must be available for public inspection.
SEC 25505.1	Use of county agricultural commissioners to distribute business plan forms to farmers
SEC 25505.2	Exemption from business plan regulations where prior ordinance existed
SEC 25505.5	Public agencies not liable for negligent review of business plan
SEC25506	Administering agency to maintain files of business plans; provide information to LEPC
SEC 25507	Threatened release or release - Immediately report the release to affected agencies
SEC 25507.01	Businesses to submit emergency notices on approved form
SEC 25508	Authority to inspect - Any employee or representative has the authority to inspect
SEC 25509	Inventory forms- Include chemical names(s), waste category, maximum amount, how handled, SIC code, name and phone number of who to contact in an emergency
SEC 25509.1	Administering agency may collect required information from another public agency
SEC 25509.3	Annual inventory to include estimated amounts of hazardous waste handled
SEC 25510	Inventory amendments require report within 30 days under some circumstances
SEC 25511	Trade Secrets - Business may apply for trade Secret as provided in US Gov Code
SEC 25512	Effect of compliance - Compliance with this law will not exempt from any other law
SEC 25513	Schedule of fees - Cities or counties may adopt a fee to support cost of program
SEC 25513.1	Counties may borrow to implement CR. 6.95; payback due by April 1, 1988
SEC 25514	Civil liability - Any business that violates this law is civilly liable for monetary fines, and, in emergency responses, the cost of cleaning up & disposal
SEC 25515	Fines & imprisonment - Are levied when convicted of failure to notify of a

	release
SEC 25515.1	Criminal sanctions for those who attempt to prevent enforcement
SEC 25515.2	Collection of civil & criminal fines and distribution to hazardous material training and waste enforcement fund
SEC 25516	Injunctions & Restraining Orders To enjoin unlawful acts to restrain the business and seek an order directing compliance
SEC 25516.1	Civil actions to be in name of people of State of California
SEC 25516.2	Injunctive relief; Pleading and proof
SEC 25517	Rewards - Can be issued to a person for providing information to convict a violator
SEC 25517.5	Development of guidelines and informational pamphlets
SEC 25518	Liberal interpretation of chapter desired
SEC 25520	Temporary adoption of emergency regulations

## RECOMMENDED PLANNING STRATEGIES FOR SUBCOMMITTEES

**ADMINISTERING AGENCIES:** Provides a forum for administering agencies and assists in developing hazards analysis for Emergency Response Plan. Will respond to information requests from public on behalf of LEPC and from LEPC/other government agencies. Promote region-wide consistency in implementing administering agency responsibilities. Assist/coordinates with other subcommittees.

**BYLAW/MEMBERSHIP:** Identify staggered positions, update roster to include expiration date of members, direct LEPC membership and officer nomination processes, provide task descriptions of each subcommittee in bylaws, bylaw modifications and updates.

**COMMUNITY OUTREACH/NETWORKING:** Responsible for Emergency Response Plan (ERP) distribution, ERP amendment records, organizing public meetings, consolidation of public comments, response to public comments, developing/identifying committee mechanisms.

**PLAN EXERCISE:** Identify and evaluate need for resources to implement and exercise plan, plan and execute exercise, provide critique of exercise.

**PLANNING:** Provide directions to LEPC to fulfill obligations mandated by SARA, Title III. Recommends time lines associated with the various activities and assures participation by all members with cooperation of general chair. Will provide recommendations for spending funds allocated to LEPC as directed by CEPRC.

**REGIONAL PLAN MAINTENANCE:** Responsibilities include revising and updating entire plan and mutual aid agreements, as well as collect information for plan from other subcommittees.

**TRAINING:** Identify what is required for Emergency Response Plan and responders, participate with other LEPC training subcommittee members and represent Region VI on the state-wide training and standardization committee.

**TRANSPORTATION:** Develop transportation analysis and update as necessary. Assists administering agencies in developing hazard analysis with transportation data support.

**INFORMATION MANAGEMENT:**

FORM INSTRUCTIONS**

**SECTION 1: COMPLETE THIS SECTION ONLY**

**NAME:** Name of person completing this request.

**TELEPHONE:** Daytime telephone number of person completing this request.

**ADDRESS:** Mailing address where information will be mailed.

**REPRESENTING:** Name of public agency, community group, environmental group, etc., person completing this request represents. If representing yourself, enter SELF.

**FACILITY NAME:** Name of company about whom information is being requested.

**FACILITY ADDRESS:** Complete mailing address of company. Include county and zip code.

**INFORMATION DESIRED:** (Attach another sheet of paper if this form does not provide enough space. Be sure to list the specific Section and exact date or chemical names under each Section.)

Check the space for the information you desire in the spaces below. If you desire all of the information, mark the "All" space. If you are requesting information on a specific release, (Section 304) enter the date on the line provided. For MSDS (Section 311) or Release Forms (Section 313), list the specific chemicals for which you are interested.

**SIGNATURE:** Signature of person making this request.

**DATE:** Date of this request.

To submit this request, you may:

Mail or deliver it to:  
Region VI Local Emergency Planning Committee  
c/o Governor's Office of Emergency Services  
4671 Liberty Avenue  
Los Alamitos, Ca. 90720-5158

or present it to the LEPC at a committee meeting. For information on meeting time and location, call: 562-795-2900.
