Emergency Alert System

IMPERIAL COUNTY, CALIFORNIA

LOCAL EMERGENCY AREA PLAN

CA-Imperial Local Emergency Communications Committee

October 2010
Emergency Alert System (EAS) -

The EAS is a warning system intended to provide the public with information that may affect life and property. An EAS warning may be for a local area or widespread - parts of a city, sections of specified areas (such as a county or parts of adjoining counties), a part or all of a region; or several states or the entire nation.

The EAS is a way to quickly provide emergency information quickly via broadcast radio, television stations and cable systems. The EAS replaces the Emergency Broadcast System. Broadcast and cable licensees participate on a voluntary organized basis for Local and State warnings, while Federal warnings and local area tests are mandatory.

Types of Warnings -

The EAS may be activated in response to emergencies called by designated Local, State and Federal Officials. Such emergencies include, but are not limited to 911 system failure, toxic release, civil disturbance, severe weather conditions and events following an earthquake.

Local Area EAS Plan -

The Local Area EAS Plan is a Federal Communications Commission (FCC) mandated document for the organization and implementation of the EAS for areas into which a state may be divided. The number of areas depends on state size and geography as well as radio and television coverage. All or parts of an area may receive stronger or more consistent broadcast signals from an adjoining area or state and may be assigned to the EAS plan of that area or state by concurrence of the SECC and LECC of the involved states and area(s), and amendment of the affected Local Area and State EAS plans.

The Local Area Plan is approved by the FCC under authority of Part 11 of the FCC Rules and Regulations. The Local Area Plan augments, but does not replace Part 11. Acceptance of or participation in this plan by FCC licensees shall not be deemed as a relinquishment of program control and shall not be deemed to prohibit a FCC licensee from exercising independent discretion and responsibility in a given situation. Stations relaying EAS emergency communications shall be deemed to have rebroadcast authority and shall be held free of any liability as a result of EAS activations.

Organization -

Responsibility with administering the Local Area Plan rests with the members of a Local Area Emergency Communications Committee (LECC). The LECC Chair and Vice Chair are appointed by the State Emergency Communications Committee Chair (SECC). The SECC and State Vice Chair are appointed by the FCC.
This is the Emergency Alert System (EAS) Plan for the Imperial County FCC Local Area. This plan is a part of the State of California Emergency Alert System Plan, both of which replace the Emergency Broadcast System plans and procedures.

This Plan consists of a cover page, an introduction, a map of the CA-Imperial Local Area, Abbreviations, and Communications Operation Orders CA-Imperial COO1-COO7.

Implementation -

Procedures and implementation of this plan include coordination with the National Weather Service (NWS).

Local Emergency Area Plans are signed by the Local Area Chair and Vice Chair for Cable, a National Weather Service (NWS) representative, the SECC Chair and the Federal Communications Commission.

Amendments as may follow, when signed by the LECC, SECC and approved by the FCC, are incorporated herein by reference.

The operational date of this plan is the date it is approved and signed by the SECC Chair. When it is approved and signed by the FCC, the LECC chair shall cause a copy to be distributed to all stations, cable system operators, and emergency managers and agencies.

This FCC Local Area includes all of the broadcast radio and cable television stations and all cable system operators in and serving Imperial County.

COMMUNICATIONS ORDER CA-IMPERIAL NUMBER 1(COO-1)

MONITOR PLAN

1.0 LP1 station is KXO/AM 1230 KHz (El Centro)

1.0.1 LP1 alternate station is KXO/FM 107.5 MHz (El Centro)

1.0.2 LP1S (Spanish Language Station) There is no LP1S at this time.

1.1 The LP1 stations will monitor:
    - KFI 640 KHz Los Angeles
    - NWR (WXL87) 162.55 MHz Black Mtn
    - CLERS 158.790 MHz

1.1.1 The LP1S station will monitor
    - NWR (WXL87) 162.55 MHz
    - KXO AM or FM 1230kHz or 107.5 MHz

1.2 The LP2 station ..There is no LP2 station at this time.
   It is recommended that all stations monitor the NWS (WXL87) 162.55Mhz.

   The LP2 station will monitor:
   - NWR (WXL87) 162.55 MHz
   - CLERS 158.790 MHz
   - KXO FM or AM 107.5 MHz or 1230 KHz
   - KFI/AM 640 KHz

1.3 All stations and CATV control points must monitor two of the following:
    - KXO/AM
    - KFI/AM 640 KHz
    - NWR (WXL87) 162.55 MHz

1.4 Stations unable to reliably receive the LP-1 or LP-1 alternate must monitor the
LP2 station and one other assignment from paragraph 1.3 above.

1.5 In addition, but not in lieu of, any other station listed in 1.1 and 1.2 above are
recommended monitoring.
2.1 National Event Codes for events required to be carried by all stations and entities

EAN  Emergency Action Notification Message  
EAT  Emergency Action Termination Message

2.2 Local Event Codes for messages to be carried by all participants in this FCC local Area.

CEM  Civil Emergency Message  
EVI  Evacuation Immediate  
FFW  Flash Flood Warning  
FLW  Flood Warning  
RMT  Required Monthly Test  
RWT  Required Weekly Test  
SVR  Severe Thunderstorm Warning  
TOR  Tornado Warning  
CAE  Amber Alert

2.3 Local Event Codes for messages that are recommended (voluntary) to be carried:

FFA  Flash Flood Watch  
FLA  Flood Watch  
HWA  High Wind Watch  
HWW  High Wind Warning  
SVA  Severe Thunderstorm Watch  
TOA  Tornado Watch

2.4 The EAS codes listed below are NOT to be relayed. They are for administrative and test purposes only.

DMO  Practice/Demonstration Warning  
ADM  Administrative Message

2.5 FIPS (location) codes to identify general areas affected are:

06025    Imperial County

Adjoining Counties:

06043    CA - San Diego County  
06035    CA - Riverside  
04027    AZ - Yuma
COMMUNICATIONS ORDER CA-IMPERIAL NUMBER 5 (COO-5)

REQUIRED MONTHLY TEST

The Coordinated Monthly Test (Event Code RMT) within every Local Area is required to be carried by all broadcast stations and CATV control points. It may be broadcast simultaneously (automatic relay rebroadcast) with the LP1 station, or delayed by no more than 15 minutes. [FCC Part 11.61(a) (1)].

6.1 The Required Monthly Test (RMT) in this FCC Local Area is conducted as follows.

a. Day: 1030 Hours, 1st Wednesday of odd numbered months

   January, March, May, July, September, November

b. Night: 2100 Hours, 1st Wednesday of even numbered months

   February, April, June, August, October, December

6.2.1 The nighttime Required Monthly Test will originate from the LP1 station on the first Wednesday of each even numbered month (6.1.b above) at 9:10 p.m. local time (LT) (2110 hours) for retransmission by all broadcast stations and CATV control points within the FCC time limit.

6.2.2 The daytime RMT will originate from the LP1 station on the first Wednesday of each odd numbered month (6.1.a above) at 10:40 a.m. LT (1040 hours) for retransmission by all broadcast stations and CATV control points within the FCC time limit.

6.3 Duration of a RMT will be approximately 45 seconds but may vary in length and the content depending on seasonal subject matter.

6.4 The State Emergency Operations Center or an alternate will transmit a monthly test that may be carried by any station in addition to the station's weekly test or in lieu of it's weekly test, but never in place of a Local Area's RMT.

6.4.1 The monthly State EAS test is conducted on the first Tuesday of every month unless otherwise notified. It is transmitted statewide at about 10:20 a.m. and must be rebroadcast within 60 minutes of receipt. It will use the ADM or DMO Event Code --- not an RMT.
7.1 An authenticator code is **not** required for use by those authorized to activate the Emergency Alert System by telephone, FAX or other unsecured transmissions.

7.2 CLERS, NWS, weather wire or hard copy media do **not** require authentication.
