**Fire & Rescue Division
Hazardous Materials Section****HMRT RESOURCE TYPING
RE-INSPECTION PROGRAM****INTRODUCTORY LETTER**

We are very pleased to see that your agency wishes to participate in the Hazardous Materials Resource Typing Re-Certification Program, and continue to support the entire Team Typing concept as well as the Fire & Rescue Mutual Aid System.

1. Enclosed is an eight (8) page "*Re-Inspection Survey Questionnaire*" (blue border). Follow the instructions on the first page. You will notice it resembles very closely the original Inspection form. It contains about 35% of the items listed in the FIREScope Hazardous Materials Standardized Equipment List (SEL).

2. Please use this document to conduct a "self inspection" at your convenience of the SEL items listed. The items listed in this survey represent typically the expendable items, disposables, small tools, printed and electronic chemical data bases and programs, some plugging and patching kits, and most all hand tools. This will greatly reduce the time necessary to conduct the "on-site" equipment inspection, - with one note:

NOTE: Up to 10 of these items will be included in a "Spot Check" during the "on-site" inspection.

3. Return the "*Re-Inspection Survey Questionnaire*" as soon as is convenient. It will be reviewed. Once this document is accepted, you will be contacted to select an "on-site" inspection date. It will be at that time the remaining SEL equipment and tool items will be inspected by the Inspection Team.

4. Please review Bulletin #35 – "*HMRT Resource Typing – Recertification Procedures*" in preparation for the "on-site" inspection.

Jan Dunbar, Assistant Chief
Special Operations
Fire & Rescue Division
California Office of Emergency Services
