

Nick Graehl | Engineering Geologist | California Department of Conservation | California Geological Survey

Nick Graehl is a geologist with the California Geological Survey's Tsunami Unit, specializing in tsunami preparedness, mitigation, response, and recovery. As co-partner of the California Tsunami Program, Graehl has developed decision support tools for emergency officials at 177+ coastal sites and 70+ ports. As an associate member of ASCE's tsunami subcommittee, Graehl has generated Tsunami Design Zone maps for California Building Code standards. Graehl also serves on multiple National Tsunami Hazard Mitigation Program subcommittees and has worked on maritime engineering projects and local hazard mitigation risk assessments.
