

SAMPLE

**State of California - Wireless E9-1-1
Typical Wireless ALI Phase II Display (Format 04)**

SUPPLEMENATAL LOCATION FIELD

Spaces 1-17: Cell Site/Sector Unique Identifier (left justified, alpha numeric value from WSP). ie: 0ab2c34; 02468-85746 (When FIXED is in WSP Name Field, use detailed location info if available. ie: BLDG D APT 13; SECT 223 LVL 2)

Spaces 19-20: Cell Sector Directional (Single in field 20 ie S; or Double in 19 & 20 ie SW)

Space 18: b = Blank space. Needed between detailed location and sector directional

Notes: Thomas Brothers Map/page/grid was used prior to 04/01/2016 and is present in ALI records prior to this date and during transition period in 2016. Phase I Map ID will not be displayed after 2nd rebid by GSM type cell phones.

LATITUDE COORDINATE (Left justified with no '+0' leader)
LONGITUDE COORDINATE (negative "-" in space 21)

W911 Phase I = LAT/LON of tower (macro/DAS)
WPH2 Phase II = LAT/LON of caller or home/business location
WFXD = Actual LAT/LON of the Antenna (Not the base station)

If W911 Phase I, PSAPs can try to rebid for WHP2. Time may vary per WSP.
Uncertainty (METERS) and Confidence Factor (PERCENT)
