  - Only Category C-G permanent projects are eligible for Title 19 Hazard Mitigation measures
  - Title 19 mitigation measures are restricted to damaged infrastructure impacted by the disaster event and in conjunction with permanent work projects
  - No state hazard mitigation funding shall be applied to any emergency protective measure.

---

---

---

---

---

---

---

---

CDAА Title 19 Hazard Mitigation

- Title 19: Public Safety
  - Documents the requirements for, and the benefits of, the CDAА program, including the utilization of hazard mitigation funding to harden infrastructure impacted by a natural hazard during the Public Assistance process
  - Hazard mitigation funding is documented in Title 19 Section 2965(c). Other Eligible Work.

---

---

---

---

---

---

---

---

### CDAА Title 19 - Hazard Mitigation

1. Eligible mitigation measures must be cost effective over the projected life of the facility for a specific facility hazard mitigation project, and substantially reduce the risk of repetitive and/or future damage, hardship, loss, or suffering resulting from a disaster or emergency.
2. Applicants with facilities subject to repetitive damage must show cause when hazard mitigation measures are not considered when repairing new disaster damage.
3. Applicants with facilities in high hazard zones... should examine hazard mitigation project possibilities when disaster repairs to these facilities are being considered.

---

---

---

---

---

---

---

---

### CDAА Title 19 - Hazard Mitigation

4. Cost effective measures are those that will not cost more than the anticipated value of the reduction in both direct damages and subsequent indirect negative impacts to the area if future disasters or emergencies occur.
  - i. Mitigation projects costing less than fifteen percent (15%) of the approved project repair, restoration, or replacement costs shall be considered cost effective.
  - ii. Mitigation projects above fifteen percent (15%) of the approved project cost may be considered cost effective if an acceptable benefit-cost analysis (BCA) has been performed.

---

---

---

---

---

- Harden and expand an engineered and maintained culvert damaged by the disaster event into a larger structure. Extend the culvert discharge beyond the toe of embankment to mitigate erosion and scour

---

---

---

---

---

---

---

---

### CDAА Hazard Mitigation Examples

Example 2

- Install a new debris barrier or grate during the repair of a disaster impacted culvert to prevent possible debris flow blockage.

---

---

---

---

---

---

---

---

### CDAА Hazard Mitigation Examples

### Important Points

1. **Identify and contact the responsible state and federal resource agencies** before work can begin;
2. **Only when EHP process is complete with those agencies and documented,** can project activities or construction begin without putting obligation of funding at risk;
3. **Sub-Applicants and Sub-Recipients are responsible** for all EHP compliance requirements;
4. **All applicable environmental laws must be addressed** in the EHP process **even if** a Statutory or a Categorical CEQA Exemption, or, a Statutory or Categorical NEPA Exclusion (e.g., STATEX or CATEx) is obtained;
5. **A change in a project scope will require the EHP process to restart** to address the modification which may delay project start;
6. **Contact CalOES PA, HMGP, and EHP** to help identify appropriate Federal and State Agency Representatives that need to be consulted with on your projects; and
7. **Keep copies** of all correspondence and other documents.
