Biomass Utilization Toolkit

12/15/2023

Overview

The California Governor's Office of Emergency Services (Cal OES), Recovery Support Functions (RSF) Unit is comprised of six RSFs—Community Planning & Capacity Building (CPCB), Economic (ECON), Health & Social Services (HSS), Housing (HSG), Infrastructure Systems (INF), and Natural & Cultural Resources (NCR).

The mission of the RSFs is to assist communities with long-term recovery efforts following an incident or disaster through the coordination of resources (e.g., funding opportunities, guidance, and technical assistance). These resources are intended to supplement traditional State and federal recovery programs including the Federal Emergency Management Agency (FEMA) Individual Assistance, Hazard Mitigation, and Public Assistance programs.

The Cal OES NCR RSF developed the Biomass Utilization Toolkit to provide information on available funding and technical assistance for current and future recovery activities and to increase resilience to future wildfire events.

For more information about the opportunities presented within this guide, as well as any questions or concerns, please contact the Cal OES RSF Unit at <u>LongTermRecovery@caloes.ca.gov</u>.

What is in this Toolkit?

The Biomass Toolkit offers a comprehensive overview of woody biomass production facilities and utilization in the state of California. The development of this guidance includes Biomass Grants and funding, technical assistance, and a detailed overview of active and non-active Sawmills and Biomass facilities across the state.

Biomass Utilization

Woody biomass can make a wide variety of products, including:

Source: University of California Agriculture and Natural Resources, Woody Biomass Utilization Group (https://ucanr.edu/sites/WoodyBiomass/Woody Biomass Library/Utilization Technology/)

Biomass Disposal Methods

	Natural Decay	Pile & Burn	In-Woods Processing	Air Curtain Burners
Economics	low cost	medium cost	revenue potential	medium to high cost
Air Quality	good	poor	good	fair
Time Required	long time (>10 years)	2 – 3 years	<1 year	2 – 3 years
Fire Hazard	very high	high	low	low
mplementation	easy	medium	complicated	medium
Season	year-around	2-3 months/year	year-around	year-around

In-Woods Biomass Disposal Methods

Note one or a mix of these four methods may be accessibility, product markets, budget, etc.

<u>Riverside</u>				1		1

Table 1: Status of Biomass Facilities by County

Updated November 10, 2023

County	Number of Pilots	Number of Proposed Facilities	Number of Active Development Facilities	Number of Operational Facilities	Number Idle Facilities	Total Number of Facilities
<u>San Joaquin</u>				1	1	2
<u>Shasta</u>		1	1	4	2	8
<u>Siskiyou</u>				2	1	3
<u>Stanislaus</u>			1			1
<u>Tulare</u>					2	2
<u>Tuolumne</u>		1		3		4
Yolo				1	1	2
Yuba			1			1
Total:	1	5	10	26	14	54

Table 2: Description of Facility Status Types

Status	About
Active Development	Construction may or may not have begun, site is purchased or being purchased, feasibility studies have been completed, web site is active, permitting is underway, and capital may be secured
ldle	Facility closed and most or all the workers have been laid off. Facility may still accept raw material, but is not processing material. Equipment is still functional and facility can theoretically be reopened at little expense
Operational	Accepting and processing raw material from CA Forests
Pilot	Facility in pre-production operating at a scale above "bench top" and below "industrial. Purpose is to test ad confirm manufacturing processes.
Proposed	No physical presence yet. Site has not been purchased. Feasibility studies may have been completed, website may be active, and capital is being raised.

Table 3: Type of Biomass Facility by County

County	Number of Thermal Facilities	Number of Biomass Power Plants	Number of Liquid Fuel Facilities	Number of Biochar Facilities	Number of TBD	Total Number of Facilities
<u>Amador</u>		1				1
<u>Butte</u>		2				2
<u>Calaveras</u>		1				1
<u>Colusa</u>		1				1
Fresno		4				4
<u>Humboldt</u>		3				3

Total:	1	11	3	1	4	2	1	2	1

Table 5: Types of Sawmills by County

Table 6: Description of Facility Types

Facility Type	Description
Cedar Mill	Facility has been optimized to produce fence boards, 1" thickness lumber, and pallet stock. Typically, only accepts cedar feedstock
Sawmill	Facility where logs are cut into lumber

Facility Type	Description
Small Log Mill	Facility has been optimized or built to efficiently process small logs (<14" small end diameter-inside-bark)
Large Log Mill	Facility is not optimized specifically for small logs (<14" small end diameter-inside- bark)
Large & Small Log Mill	A portion of the facility has been optimized to accept small logs, but can also accept logs >14" small end diameter-inside-bark
Fence board Mill	Facility has been optimized to produce fence boards, 1" thickness lumber and pallet stock
Firewood	Facility optimized to produce firewood

California State Grant & Loan Resources

California Infras	tructure and Economic Development Bank (iBank) Climate Catalyst Program
Application Deadline	Ongoing
Program Description	 The Climate Catalyst Revolving Loan Fund is designed to: Jumpstart critical climate solutions through flexible, low-cost credit and credit support. Help bridge the financing gap that currently prevents these advanced technologies from scaling into the marketplace. Mobilize public and private finance for shovel-ready projects that are stuck in the deployment phase. Accelerate the speed and scale at which technologically proven, critical climate solutions are deployed. Also supports projects that reduce wildfire threats through forest biomass management and utilization such as forestry practices, sustainable vegetation management, and timber harvesting products such as advance energy and construction materials.
Eligibility	Private and Public Sector
Maximum Award	Dependent on loan amount requested
Application Process	If you have a climate-smart agriculture or forest biomass management or utilization project and have written expressions of interest from other financing parties, complete the Climate Catalyst Intake Form: <u>https://ibank.ca.gov/climate-catalyst-intake-form/</u>
Website	https://www.ibank.ca.gov/climate-financing/climate-catalyst- program/ Climate Catalyst Fact Sheet: https://ibank.ca.gov/wp- content/uploads/2022/08/Climate-Catalyst-Fact-Sheet.pdf
Contact Information	Email: <u>climatefinancing@ibank.ca.gov</u> Phone: 916-341-6600
Timeline for Funding Availability	Ongoing

Calif	California Public Utilities Commission (CPUC)			
	Bioenergy Feed-in Tariff Program			
Application Deadline	Content			
Program Description	The Bioenergy Feed-in Tariff Program or the Bioenergy Market Adjusting Tariff (BioMAT) is a feed-in tariff program for small bioenergy renewable generators less than 5 MW in size (other small renewable generators are procured through the Renewable Market Adjusting Tariff). The BioMAT program offers up to 250 MW to eligible projects through a fixed-price standard contract to export electricity to California's three large investor-owned utilities (IOUs). Electricity generated as part of the BioMAT program counts towards the utilities' RPS targets.			
	BioMAT offers 10, 15 or 20-year power purchase agreements (PPAs) to purchase wholesale power generated from small renewable bioenergy projects with nameplates up to 5 MW, provided that not more than 3 MW is delivered to the grid at any time.			
	 Project must be in the service territory of Pacific Gas and Electric (PG&E), Southern California Edison (SCE), or San Diego Gas and Electric (SDG&E) and be connected on the distribution or transmission system. 			
Eligibility	 Project nameplate may be sized 5 MW or smaller, provided that no more than 3 MW is delivered to the grid at any time. Project must commence operations after June 1, 2013. Project must have passed the interconnection Fast Track screens, passed Supplemental Review, completed a System Impact Study in the Independent Study Process, completed a Distribution Group Study Phase 1 Interconnection Study in the Distribution Group Study Process, or completed a Phase 1 Study in the Cluster Study Process. 			
Maximum Award	 For utility specific BioMAT information, including materials describing procurement and pricing status, please visit the following links: <u>Pacific Gas and Electric (PG&E) BioMAT Program</u> <u>Southern California Edison (SCE) BioMAT Program</u> <u>San Diego Gas and Electric (SDG&E) BioMAT Program</u> 			

Application Process	 To apply, go to the appropriate utility: <u>Pacific Gas and Electric (PG&E) BioMAT Program</u> <u>Southern California Edison (SCE) BioMAT Program</u> <u>San Diego Gas and Electric (SDG&E) BioMAT Program</u>

Timeline for Funding Availability	Ongoing

Federal Grant & Loan Resources

USDA-RD Rural Energy for America Program Renewable Energy Systems & Energy Efficiency Improvement Guaranteed Loans & Grants					
Application Deadline	October 31, 2022 and March 31, 2023				
	The program provides guaranteed loan financing and grant funding to agricultural producers and rural small businesses for renewable energy systems or to make energy efficiency improvements. Agricultural producers may also apply for new energy efficient equipment and new system loans for agricultural production and processing.				
Program Description	 Biomass (for example: biodiesel and ethanol, anaerobic digesters, and solid fuels). Geothermal for electric generation or direct use. Hydropower below 30 megawatts. Hydrogen. Small and large wind generation. Small and large solar generation. Ocean (tidal, current, thermal) generation. 				

Eligibility	Agricultural producers with at least 50 percent of their gross income coming from agricultural operations.
	Small businesses in eligible rural areas.
Maximum Award	Dependent on application and if requesting grant or loan
	Please speak to a Rural Development Energy Coordinator before filling out any form or application online.
Application Process	Find your Rural Development Energy Coordinator here: <u>https://www.Rdusda.gov/sites/default/files/RBS_StateEnergyCoordinators.pdf</u>
Website	https://www.Rdusda.gov/programs-services/energy- programs/rural-energy-america-program-renewable-energy- systems-energy-efficiency-improvement-guaranteed-loans/ca
Contact Information	John Strauch Email: <u>john.strauch@usda.gov</u> Phone: 530-223-4137, Ext. 113
Timeline for Funding Availability	Ongoing

USDA-RD Business & Industry Loan Guarantees				
Application Deadline	Applications are accepted from lenders year-round.			
Program Description	 This program offers loan guarantees to lenders for their loans to rural businesses. Eligible uses include (but are not limited to): Business conversion, enlargement, repair, modernization, or development. The purchase and development of land, buildings, and associated infrastructure for commercial or industrial properties. The purchase and installation of machinery and equipment, supplies, or inventory. Debt refinancing when such refinancing improves cash flow and creates jobs. 			

	 Business and industrial acquisitions when the loan will maintain business operations and create or save jobs.
Eligibility	 What lenders may apply for this program? Lenders need the legal authority, financial strength, and sufficient experience to operate a successful lending program. This includes lenders that are subject to supervision and credit examination by the applicable agency of the United States or a State including: Federal and State-chartered banks. Savings and loans. Farm Credit Banks with direct lending authority. Credit unions. Other non-regulated lending institutions may be approved by the Agency under the criteria of the OneRD Guarantee Loan Initiative regulation. Who may qualify for these guaranteed loans? For-profit or non-profit businesses. Cooperatives.
	 Federally recognized Tribes Public bodies. Individuals engaged or proposing to engage in a business.
Maximum Award	Dependent on application.
Application Process	Applications are accepted from lenders through <u>USDA local</u> <u>offices</u> year-round. Interested borrowers should inquire about the program with their lender. Lenders interested in participating in this program should contact the <u>USDA Rural Development Business Programs Director in the</u> <u>state</u> where the project is located.
Website	https://www.rd.usda.gov/programs-services/business- programs/business-industry-loan-guarantees/ca Loan Fact Sheet: https://www.rd.usda.gov/sites/default/files/fact- sheet/508_RD_FS_RBS_BIGuarantee.pdf
Contact Information	Contact the local Rural Development office that serves your area.

USDA-RD Advanced Biofuel Payment Program			
Application Deadline	Applications are accepted in October of each year. To enroll, a producer must file an application and information by October 31st.		
Program Description	This program's goal is to increase the production of advanced biofuels. Any entity that produces and sells advanced biofuel is eligible to apply. An advanced biofuel producer can be an individual, corporation, company, foundation, association, labor organization, firm, partnership, society, joint-stock company, governmental entities, schools and other types of educational facilities, group of organizations, or a nonprofit entity that produces and sells an advanced biofuel.		
Eligibility	 Eligible advanced biofuels: Must meet the definition of an advanced biofuel in 7 CFR Part 4288.102. Are a liquid, gas, or solid. Must be derived from renewable biomass, other than corn kernel starch. Must be a final product. Are produced in the United States. Are ones where the buyers and sellers act independently and have no relationship to each other. 		
Maximum Award	Producers will be paid on a quarterly basis for the actual quantity of eligible advanced biofuel produced during the quarter. The payment amount depends on the number of eligible producers, the amount of advanced biofuel produced, and the amount of funds available during the fiscal year. There is no minimum or maximum payment.		
Application Process	Complete the Advanced Biofuel Payment Program Enrollment Request: <u>https://www.rd.usda.gov/programs-services/energy-</u> programs/advanced-biofuel-payment-program/ca		
Website	Program website: <u>https://www.rd.usda.gov/programs-</u> <u>services/energy-programs/advanced-biofuel-payment-</u> <u>program/ca</u>		

	Program fact sheet: https://www.rd.usda.gov/sites/default/files/fact- sheet/508_RD_FS_RBS_AdvancedBioFuel.pdf
Contact Information	Contact your <u>State Rural Development Energy Coordinator</u> .
Timeline for Funding Availability	Applications are accepted from lenders year-round.

US Forest Service (USFS) Community Wood Grant Program								
Application DeadlineThe 2023 Community Wood Grant Program application period be announced soon.								
Program Description	The Community Wood Grant Program provides funding for grants to install thermally led community wood energy systems or to build innovative wood product manufacturing facilities. The Forest Service expects renewable wood energy systems installed under this program to use the most stringent control technologies. The program places extra emphasis on assisting sawmills in economically challenged areas to retool or add advanced technology.							
Eligibility	Eligible applicants are non-profits; local, state, and tribal governments; businesses, companies, corporations (for profit); institutions of higher education; and special purpose districts (public utility districts, fire districts, conservation districts, school districts, and ports.)							
Maximum Award	2022 - \$1,000,000							
Application Process	Check the USFS Wood Innovations Program website and Federal Grants website for application instructions.							
Website USFS Wood Innovations Program website: https://www.fs.usda.gov/science-technology/energy-forest- products/wood-innovation								

	Federal Grants website: https://www.grants.gov/web/grants/view-opportunity.html?oppld=335463						
Contact Information Patrick Rappold, Regional Wood Utilization Specialist Phone: 414-477-9167 Email: patrick.rappold@usda.gov							
Timeline for Funding Availability	TBD						

Philanthropic Grants

	Blooming Prairie Foundation (BPF)
Application Deadline	The Foundation is pausing grant issuance during 2022. Please check back in January 2023 for updates on future granting options.
Program Description	 Memorializing the priorities and values of the Blooming Prairie Cooperative Warehouse, the Blooming Prairie Foundation is a 501 (c) (3) organization with a similar ethos - to work to further the health of people, the planet and the cooperative business model by supporting development, research, and educational efforts in the organic industry and the cooperative community. BPF will work to encourage, support, promote and enhance the development of organic and natural products and enhance cooperative development in the natural products industry. Conduct any of the following activities: Developmental, research and education efforts in the organic industry and the cooperative community The development of organic and natural products or services Cooperative development in the natural products or organic industry.
Eligibility	organizations that qualify as exempt organizations under section 501(c)(3) of the Internal Revenue Code
Maximum Award	Dependent on application and amount of funding available.

Application Process	http://www.bloomingprairiefoundation.org/apply						
Website	http://www.bloomingprairiefoundation.org/grant-information- qualifications						
Contact Information	Stephanie Ricketts, Grants Administrator Phone: 608-216-8152 Email: <u>bloomingprairiefoundation@gmail.com</u>						
Timeline for Funding AvailabilityTBD							

Clif Family Foundation Operational Support Grant									
Application Deadline	Applications are reviewed three times a year; applications are due at 11:59 pm PST on February 1, June 1, and October 1.								
Program Description	 This grant supports daily operating costs of 501 (c) (3) non-profit organizations. Priority is given to applicants that: Address two or more of our funding priorities at the same time: Strengthen our food system Enhance equitable community health outcomes Safeguard our environment and natural resources Demonstrate strong community ties. Operate within viable and clearly defined plans for positive change. 								
Eligibility	501(c)(3) non-profit organizations								
Maximum Award	Dependent on application and amount of funding available.								
Application Process	https://cliffamilyfoundation.submittable.com/submit								
Website	https://cliffamilyfoundation.org/grants-program								

Contact Information	Email: info@cliffamilyfoundation.org						
Timeline for Funding Availability	Applications are reviewed three times a year; the deadlines are February 1, June 1, and October 1. Grants awarded during one cycle will be announced at the beginning of the following cycle.						

Additional Support & Technical Assistance

Califo	California Statewide Wood Energy Team (SWET)							
Program Description	The California Statewide Wood Energy Team (SWET) is a subgroup of the ad-hoc CA Forest Biomass Working Group. They work directly with wood energy businesses and community-led wood energy projects to provide expertise, technical assistance, and small grants. The team also produces work to effectively develop the California wood energy industry.							
	 Through a cooperative agreement between the US Forest Service and The Watershed Research and Training Center, SWET is funded through 2018 to do the following activities: Provide a Network of Wood Energy Expertise for Communities 							
	 Conduct Outreach to Communities Interested in Pursuing Wood Energy 							
	Conduct Community Interest Workshops							
	 Research and compile Funding Information Present the Financial Community with useful resources 							
	 Provide free Pre-feasibility Assessments worth \$2,500 							
	Assist Communities in applying for full Feasibility Assessment							
	Funding							
	Help Projects overcome general Barriers							
Website	https://ucanr.edu/sites/swet/							

California Conservation Corps (CCC) Greenhouse Gas Reduction Fund (GCRF) for Forest Health							
Program Description	 Greenhouse Gas Reduction Fund (GGRF) monies were appropriated to the CCC to provide formal and on-the-job training and work experience to complete projects that aid in reducing Greenhouse Gas (GHG) emissions. Examples of projects that incorporate formal and on-the-job training and support GHG reduction include, but are not limited to: Fuel Load Reduction: removing dead and dying trees, brush and vegetation to reduce wildfire intensity and rate of spread Reforestation and Restoration: planting seedlings on elefonetee elements. 						
	 deforested land; burned area recovery Wetland/Riparian Restoration: restoring or enhancing of waterways, mountain meadows and upland habitat Urban & Community Forestry: increasing the urban tree canopy Urban Greening: expanding or enhancing of neighborhood parks and community gardens; building non-motorized urban trails 						
Website	https://ccc.ca.gov/what-we-do/funding-opportunities/ggrf-forest- health/						
Contact Information	Project planners seeking to utilize the CCC can contact their nearest <u>CCC center</u> or <u>email the CCC</u> for more information on how to partner with us.						

CCC Forestry Corps					
Program Description	The Forestry Corps is made up of six CCC crews based at the Chico, Inland Empire, Pomona, Solano, and Tahoe Centers. Forestry Corps members reduce the risk of wildfire by removing hazardous fire fuels, plant trees and seedlings, collect cones and seeds, fell hazard and dying trees, receive arborist training and certifications. The Forestry Corps partners with CAL FIRE, US Forest Service, county agencies, fire safe councils, and others on project work.
